<b>Description of Change:</b>  For Riedon standard part types identified above, <u>with resistance values of 0.010 Ohms and below</u> , the specification for Temperature Coefficient of Resistance (TCR) of these parts will be changed from $\pm 200$ ppm/ $^{\circ}$ C to $\pm 300$ ppm/ $^{\circ}$ C. TCR specifications for resistance values above 0.010 are unaffected.																							
<b>Reason For Change:</b>  The effected part types utilize a metal foil technology. Foil material which has been used in the past for these parts is no longer available and must be replaced with foil material which is only capable of TCR values of $\pm 300$ ppm/ $^{\circ}$ C in the resistance range of 0.010 Ohm and below.																							
<b>Effective Date of Change:</b> March 31, 2017  All effected product with Date Codes of 1720 and beyond (shipped on June 1, 2017 and beyond) will incorporate the changed material system.																							

<p><b>Part Characteristics Affected:</b> TCR is changed as specified above. No other change to part Form, Fit or Function specifications.</p>	<p><b>Supportive Documentation provided?</b> <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes</p>
<p><b>Qualification Testing Performed/To be Performed:</b> Testing confirms all existing specifications except the TCR spec cited in this notice.</p>	<p><input checked="" type="checkbox"/> Change is Permanent <input type="checkbox"/> Change is for Fixed Quantity <input type="checkbox"/> Change applies to Customer PO</p>
<p><b>Does the change affect the components ability to comply with REACH or RoHS requirements?</b> <input checked="" type="checkbox"/> No, REACH and RoHS Compliant <input type="checkbox"/> Yes (if YES, describe in detail):</p>	<p style="text-align: center;">   <hr style="width: 100%; border: 0; border-top: 1px solid black; margin: 5px 0;"/> <b>Greg Wood, Quality Manager</b> </p>
